The OASIS Improvement Package Designed Specifically for Minnesota Agencies

Minnesota's OASIS Improvement Package has been designed to be the centerpiece for the state's campaign to improve every agency's Home Health Compare quality scores, case mix weight and revenue appropriateness.

Goals

1. To provide every agency in Minnesota with an on-going OASIS training and improvement package.
2. To dramatically reduce costs and make it affordable for every agency in Minnesota.
3. To make the improvement package the center piece of Minnesota's Campaign for Home Care Excellence.

The Package

The OASIS Improvement Package is a year-long program designed to train, track, and test every clinician in the state. The package includes three services:

- **OASIS Training:** Monthly on demand webinar trainings on OASIS C and best practices for ensuring accurate assessments. Taught by some of the nation's leading OASIS trainers and clinicians; Cindy Krafft, Rhonda Will, and Mel Duerr.
- **OASIS Tracking:** Track and trend the impact of clinician scoring on your agency's case mix weight, primary diagnosis, therapy visits and other key clinical measures. Includes the OASIS Tracker Dashboard!
- **OASIS Testing:** Ensure your clinicians' competency by conducting quarterly competency tests. Compare your clinicians' scores to each other and/or by team, office, division or against national averages.

Cost

\$600/year/office and \$40/year/clinician for quarterly testing, scoring and agency specific reports. To purchase, [click here](#).
